Introduction

Background :

Octa Herbals is a first Pakistani Shampoo Company. They provide the Product made by completely herbal formula. So the main purpose of this project was to make a little website for this company so that It will be easy for customers to buy the product online. They can order online & get the product on home delivery.

Company Can also save their data in the base.

Goals :

- Customers can order online .
- Admin can enter & remove employee. He can also view details of employees & customers.

Description :

There are 2 main modules of the project :

1. For Customer
2. For Admin

Customer :

Customer have functionalities about order only. Related to order Customer can do 3 functionalities.

- 1. Place order :** In Place order customer can order his project by filling the online form. In form he has to fill his personal details & quantity of the project.
He also have to enter a unique id for his order. If id is already registered then customer has to enter another id.

2. **View order** : If customer has ordered the project he can view his order details by entering his Order_Id. Customer can view his order details i.e quantity, total price , discount & payable amount etc.

If customer do not have ordered product then he will get msg on screen that record is not found.

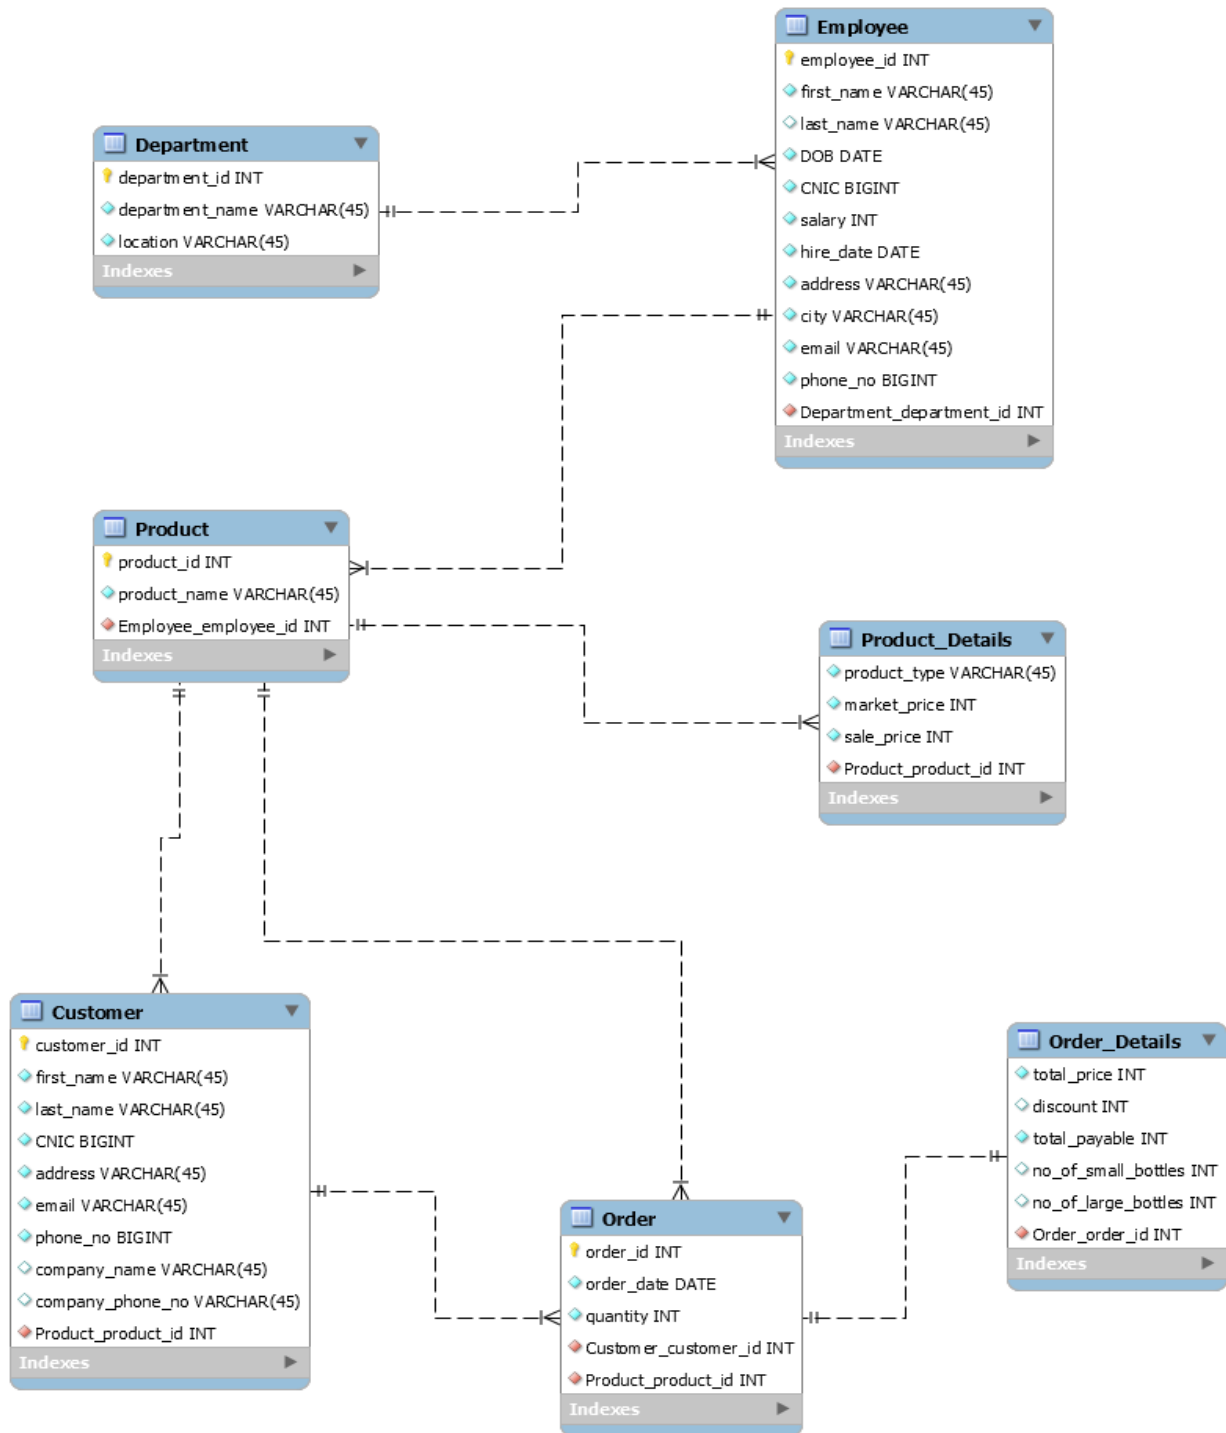

3. **Cancel order** : In this customer can cancel his order. He has to enter his order id then his order will be cancelled.

Admin :

Admin have to login to access his portion.Admin have 4 functionalities yet :

- **Enter Employee** : In this portion admin can enter the details of a new employee. For this he have to log in & fill the form.
- **Remove Employee** : In this portion admin can remove the details of an employee.
- **View Employee Details** : In this portion admin can view details of all the employees of the company along with tha department & salary.
- **View Customer Details** : In this portion admin can view details of all the customers.

Invalid username or password :

If someone enters wrong username or password then the alert will be shown.

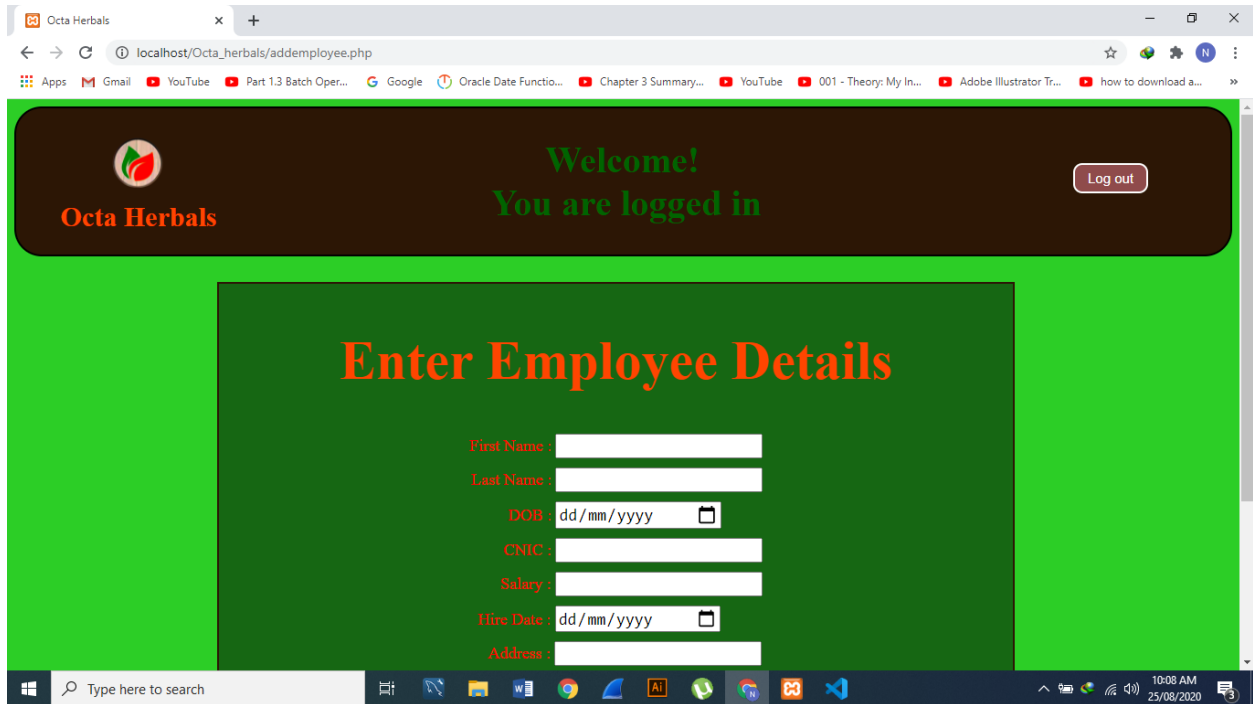

Welcome page:

After login Admin is directed to welcome page. And welcome page is further directed to 4 pages i.e enter employee , remove employee, view employee details, view customer details.

Add Employee :

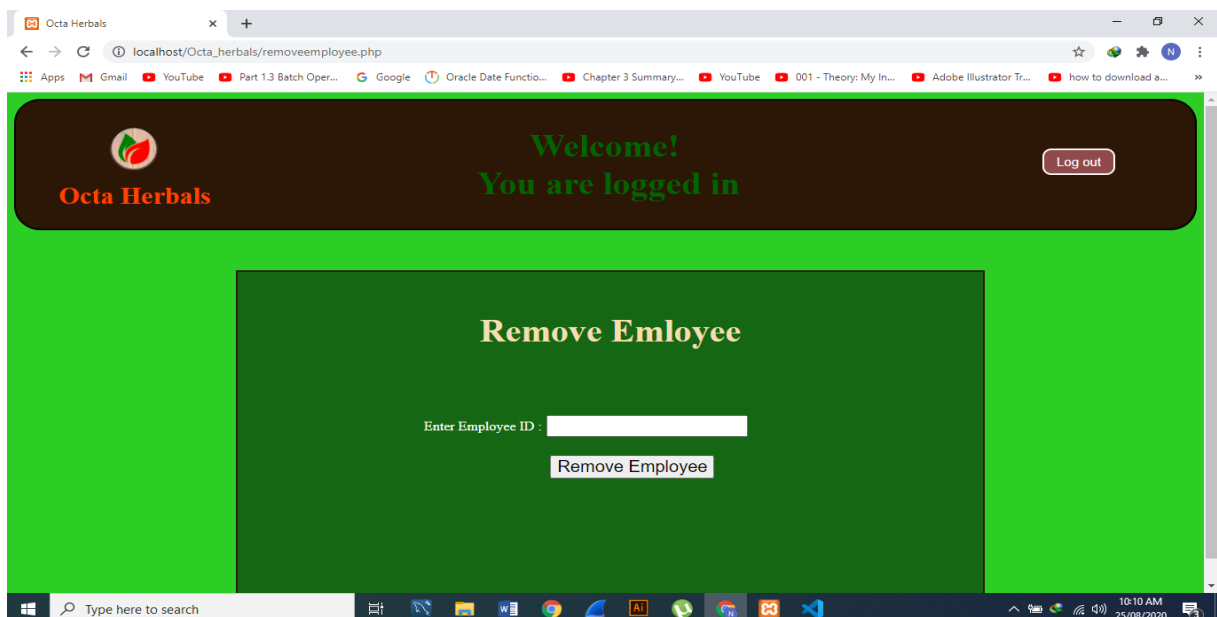

Admin can enter a new employee by filling personal details of employee in form. Only admin has control of this page.

The screenshot shows a web browser window with the URL `localhost/Octa_herbals/addemployee.php`. The page has a dark green header with the 'Octa Herbals' logo and a 'Welcome! You are logged in' message, with a 'Log out' button. The main content area is light green and features a dark green box titled 'Enter Employee Details'. Inside this box, there are input fields for 'First Name', 'Last Name', 'DOB' (with a date picker), 'CNIC', 'Salary', 'Hire Date' (with a date picker), and 'Address'.

Remove Employee:

Admin can remove an employee by entering employee id. Only admin has control of this page.

The screenshot shows a web browser window with the URL `localhost/Octa_herbals/removeemployee.php`. The page layout is identical to the 'Add Employee' page, with the same header and main content area. The dark green box in the center is titled 'Remove Employee' and contains a single input field labeled 'Enter Employee ID:' and a 'Remove Employee' button.

View Employee Details:

Admin can view details of all the employees.
